## PRODUCT DESCRIPTION

ABB MACN2-02-AT, order code 1SAL100998R9906, is an exact commercial reference for this contactor auxiliary contact in the ABB Contactor Auxiliary Contacts range. The type designation and order code are printed together in an official ABB commercial table on PDF page 160; the identity was not inferred from a pattern, generated from a formula, or copied from an unauthorised reseller. This product has normal recurring relevance across Egypt, the GCC and wider MENA for contactor installation, motor starter assembly, panel building, preventive maintenance and replacement work. Use both ABB identifiers on the RFQ so host contactor frame, mounting position, contact arrangement, coil voltage and terminal style remain exact. Before final engineering selection, compare the downloadable ABB family catalog with the system voltage, load duty, prospective fault current, enclosure, ambient temperature, coordination study, standards and connected equipment. InduMarket provides this listing for project, maintenance and replacement sourcing on an RFQ basis and does not claim that physical stock is held. The product page links its verified specifications, hosted catalog image, downloadable ABB documentation and quotation form so the requested configuration remains attached to the enquiry.

## MANUFACTURER DOCUMENTATION

No manufacturer document is linked because exact-SKU or compatible-family evidence has not been recorded.

Document status: This is an InduMarket product specification summary, not a manufacturer-issued datasheet. It is generated from the catalog record for the exact part number. Any linked manufacturer document passed the SKU-compatibility evidence gate. Confirm ratings, compatibility, certifications and any successor reference before ordering.
