## PRODUCT DESCRIPTION

ABB MPET4-1021, order code 1SFA611599R1021, is an exact commercial reference for this emergency stop in the ABB Pilot Devices range. The type designation and order code are printed together in an official ABB commercial table on PDF page 12; the identity was not inferred from a pattern, generated from a formula, or copied from an unauthorised reseller. This product has normal recurring relevance across Egypt, the GCC and wider MENA for industrial control stations, motor-control panels, machine interfaces, process skids and safety-related operator functions. Use both ABB identifiers on the RFQ so operator action, colour, marking, contact arrangement, illumination voltage, bezel and mounting arrangement remain exact. Before final engineering selection, compare the downloadable ABB family catalog with the system voltage, load duty, prospective fault current, enclosure, ambient temperature, coordination study, standards and connected equipment. InduMarket provides this listing for project, maintenance and replacement sourcing on an RFQ basis and does not claim that physical stock is held. The product page links its verified specifications, hosted catalog image, downloadable ABB documentation and quotation form so the requested configuration remains attached to the enquiry.

## MANUFACTURER DOCUMENTATION

No manufacturer document is linked because exact-SKU or compatible-family evidence has not been recorded.

Document status: This is an InduMarket product specification summary, not a manufacturer-issued datasheet. It is generated from the catalog record for the exact part number. Any linked manufacturer document passed the SKU-compatibility evidence gate. Confirm ratings, compatibility, certifications and any successor reference before ordering.
