## PRODUCT DESCRIPTION

Siemens 6ES7974-0AA00-0AA0 is the exact manufacturer order number for a analog input module in the SIMATIC S7-300 Connection System portfolio. Siemens describes this exact reference as: *** spare part *** SIMATIC S7, measuring range module for analog inputs, 2 units per packing unit. The verified manufacturer lifecycle record is PM410:Product cancellation. This listing therefore presents the item honestly as a legacy replacement / obsolete product; obsolete S7-300 and S7-400 references are included for installed-base maintenance, migration planning and replacement enquiries, not as new current-production products. The product is relevant to industrial automation systems used across Egypt, the GCC and wider MENA in manufacturing, water and wastewater, utilities, oil and gas, infrastructure, buildings and OEM machinery. Quote requests must use the complete order number 6ES7974-0AA00-0AA0 so voltage, channel count, interface, firmware, connector, rack and system compatibility can be checked against the installed equipment. The linked Siemens product page and downloadable Siemens technical data sheet are the controlling sources. Before ordering, confirm the hardware release, STEP 7 or TIA Portal compatibility, required memory or interface modules, environmental rating, certifications and any Siemens successor. InduMarket offers this item on an RFQ basis and makes no stock, fixed-price or lead-time claim.

## MANUFACTURER DOCUMENTATION

No manufacturer document is linked because exact-SKU or compatible-family evidence has not been recorded.

Document status: This is an InduMarket product specification summary, not a manufacturer-issued datasheet. It is generated from the catalog record for the exact part number. Any linked manufacturer document passed the SKU-compatibility evidence gate. Confirm ratings, compatibility, certifications and any successor reference before ordering.
